The special circumstances of the two Coronavirus years (2020 and 2021) are also reflected in some of the figures in this publication.

2025 is a special year for Upper Austria. We look back on 80 years of living in peace, 70 years of the second republic and 30 years of membership in the European Union. The long-term view in particular shows that Upper Austria has embarked on a successful path. In many areas of life, from the economy and labour market to social life, healthcare or environment and sustainability – Upper Austria is a very good place to live.

© State of Upper Austria

An important ingredient in our federal state's recipe for success is decision-making based on facts and figures. Important decisions were made on the basis of scientific findings and objective observations. The information provided by Statistics Upper Austria has been and continues to be an essential source for this, which, in addition to politics and administration, should be made available to all Upper Austrians.

The Upper Austrian success story of the past is also a mandate for the future. Especially in times of transformation and change, we have the opportunity to take new paths. The Facts & Figures should also provide us with a broad and well-founded basis for decision-making. I invite you to rediscover Upper Austria in the figures and to use the facts as inspiration for future success stories.

A handwritten signature in black ink, appearing to read 'Stelzer', with a stylized flourish at the end.

Country symbols and history

National coat of arms

The national coat of arms consists of a split shield crowned with the Austrian Archducal hat, depicting a golden eagle with a red tongue and red claws against a black field on the heraldic right, split three times by silver and red on the heraldic left. The national coat of arms may be in colour or in black and white and may or may not include the Archducal hat.

National colours

White and red

Change in population between 2011–2024 (in %)

1 for the national or register-based census or as of 1 January 2024 according to the central population register (Popreg) | territorial status as of 1 January 2024

Small-scale population forecast

A look into the future shows that Upper Austria will grow with varying intensity from region to region. Irrespective of municipal boundaries, four types of regions with similar characteristics can be identified.

Shrinking regions (dark grey) are less well connected in terms of transport. Characteristic is the migration of young adults (aged 20 to 29) who are unable to find adequate jobs to start their careers due to their qualifications, which has been observed for some time. This phenomenon is exacerbated by a decline in the number of jobs available in this type of region. Parts of the districts of Rohrbach, Freistadt, Perg and Schärding, the inner Salzkammergut and the Pyhrn-Eisenwurzen region are particularly affected by declining populations.

Upper Austria has a very well-developed road and rail network (not shown). The better a region's infrastructure, the more dynamic its population growth. Affordable housing, employment opportunities and other infrastructure facilities also play an important role in the decision to relocate.

The growth regions are arranged approximately in layers or rings. Starting from the centre, where the strongest population growth takes place (dark orange colouring), this weakens with increasing distance (transition from light orange to light grey) in the surrounding area.

**Expected population change
2025–2050 (in %)**

Population structure

Population – by gender and age¹

Population (15 years and older) – by marital status (absolute | in %)² and the proportion of women (♀) in % respectively

1 as of 1 January 2024 according to the central population register | ♀ Women, ♂ Men | differences due to rounding possible

2 as of 31 October 2022 according to the register-based labour market statistics | incl. marital status in cases of same-sex partners | differences due to rounding possible

Age structure of the population over time¹

1 as of 1 January 2024 according to the central population register | age in years of life by gender (♂ Men, ♀ Women) and citizenship

Population¹ – by employment status and proportion of women (♀) in %

Total population

Employed persons²

Population³ – by citizenship⁴ (absolute | in %) and the proportion of women (♀) in %

1 as of 31 October 2022 (1,521,868 people) according to the register-based labour market statistics | differences due to rounding possible

2 according to the concept of the International Labour Organization (gainfully employed for at least 1 hour per week)

3 as of 1 January 2024 (1,530,349 people) according to the central population register

4 Abroad and Other countries: incl. unknown | EU countries: excluding the United Kingdom | Former Yugoslavia: excluding Croatia and Slovenia

Population – by (foreign) origin¹ (absolute | in %)

Changes from 2004 to 2024 in %

1 as of 1 January 2024 (1,530,349 persons) or the specified reference year according to the central population register | nationality or country of birth | differences due to rounding possible

2 persons with foreign citizenship or nationals born abroad

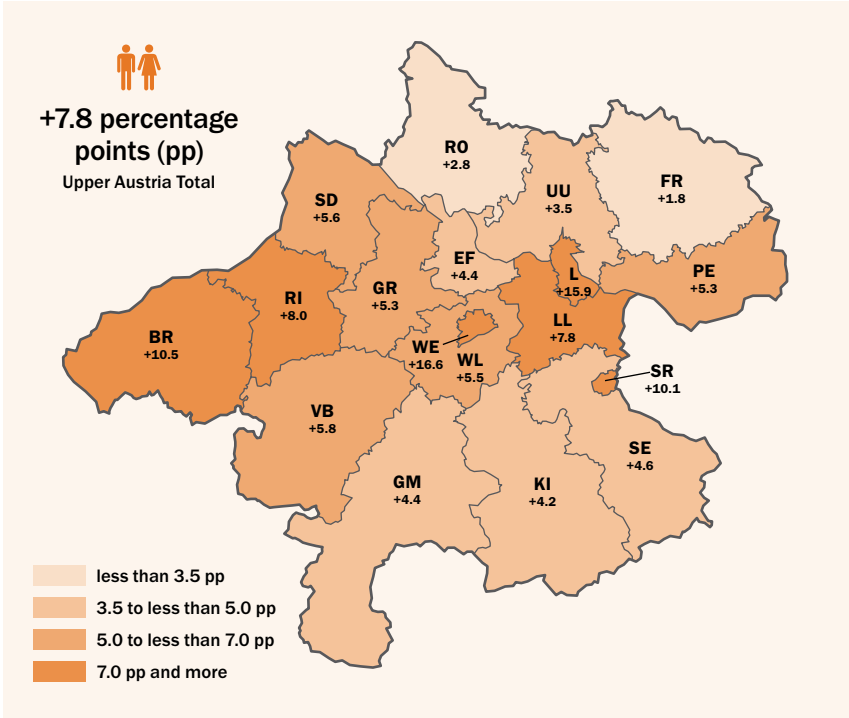

3 % shares in relation to population of foreign origin

Change in share between 2004–2024 (in percentage points)

1 as of 1 January according to the central population register | persons with foreign citizenship or Austrians born abroad | differences due to rounding possible

Natural population trend

Population change¹

- between the beginning and end of 2023 or the specified year
- balance of live births minus deaths
- calculated residual value of total change minus birth balance (a positive balance means: more immigrants than emigrants – and vice versa)
- year 2023, respectively specified year | incl. children born abroad to mothers with main residence in Upper Austria | differences due to rounding possible
- indicates how many live-born children a woman would give birth to in the course of her life if her fertility rate at each age in the future were as it was observed in the population in the reporting year, and if the woman's mortality were disregarded (number of children per woman)
- arithmetic mean of the age distribution of the one-year fertility rates
- nationality of the child
- live birth sequence | 3.+ child: third or subsequent child

Live births⁴

Deaths¹

14,782

In total

49.9%

Proportion of women

9.7

per 1,000 of the population

In comparison	2021	2022	2023
Total number of deaths	15,201	15,233	14,782
thereof female	49.8%	49.8%	49.9%
per 1,000 of the population	10.1	10.0	9.7
Infant mortality rate ²	2.5	2.1	2.8

Marriages³

7,906

In total

31.4 years

Ø marriage age of the woman⁴

33.3 years

Ø marriage age of the man⁴

In comparison	2021	2022	2023
Total marriages	7,378	8,277	7,906
of which first marriages	74.5%	73.1%	73.8%
Average marriage age of the woman (years) ⁴	31.2	31.3	31.4
Average marriage age of the man (years) ⁴	33.1	33.3	33.3

Divorces⁵

2,332

In total

1.5

per 1,000 of the population

33.5%

Total divorce rate⁶

10.1 years

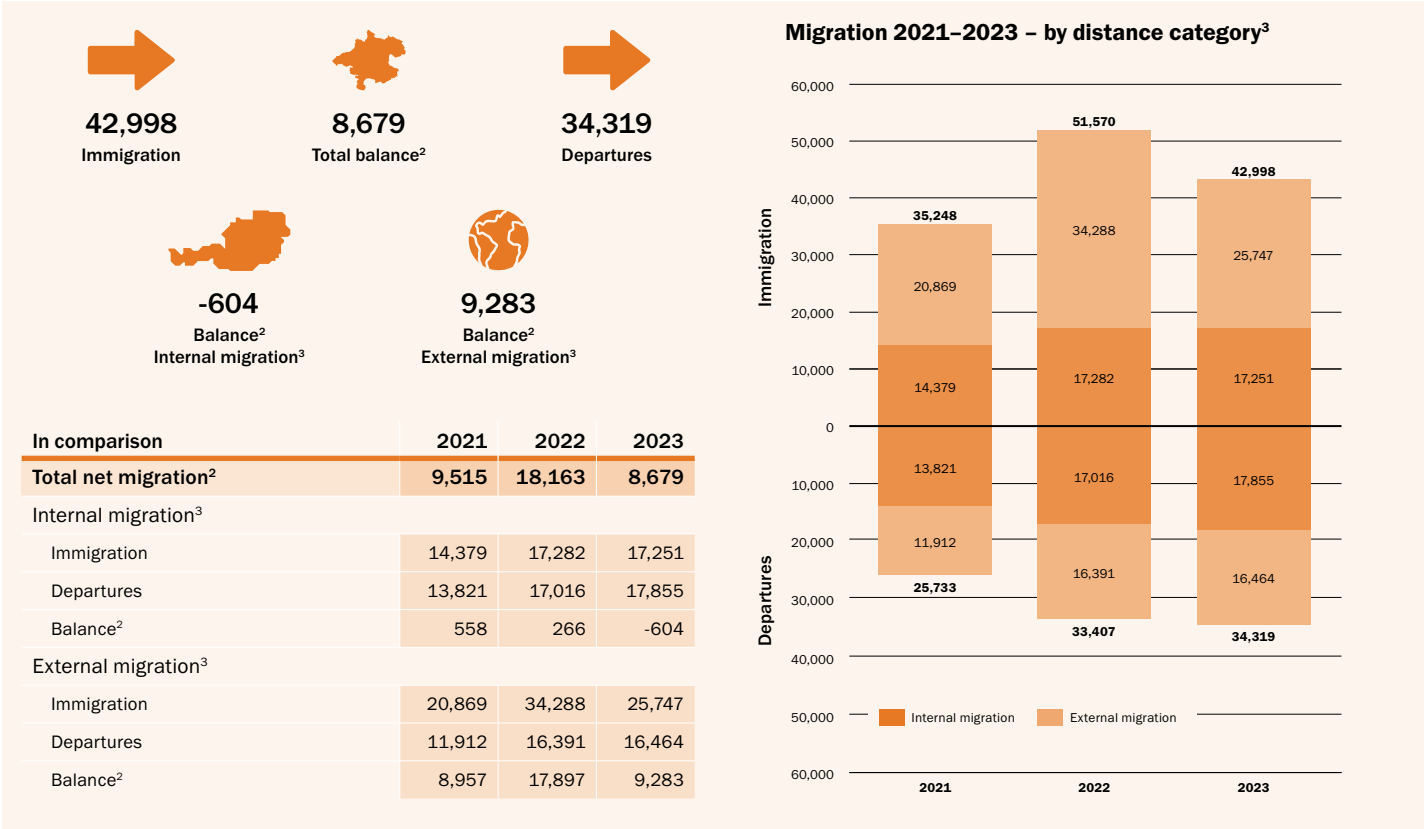

Median duration of marriage⁷

In comparison	2021	2022	2023
Total divorces	2,232	2,121	2,332
per 1,000 of the population	1.5	1.4	1.5
Total divorce rate ⁶	32.5%	30.9%	33.5%
Median duration of marriage (years) ⁷	10.4	10.2	10.1

- 1 year 2023, respectively specified year | incl. foreign deaths of persons with main residence in Upper Austria
- 2 deaths in the first year of life in relation to 1,000 live births in the same calendar year
- 3 year 2023, respectively specified year | incl. marriages concluded abroad by persons with main residence in Upper Austria | restricted to opposite-sex marriages
- 4 single, under 50 years old
- 5 year 2023, respectively specified year | incl. divorces abroad by persons with main residence in Upper Austria
- 6 indicates the percentage of divorced marriages that can be expected for marriages concluded today based on the marriage duration-specific divorce rates observed in the reporting year
- 7 median duration of divorced marriages at the time of divorce (half of the values ranked by duration of marriage are above and half are below this central value)

Source: Statistics Austria

Migration¹

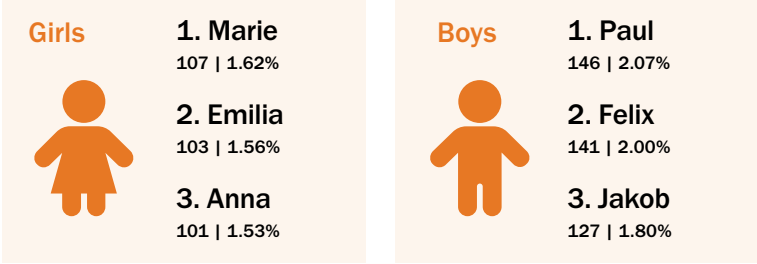

1 year 2023, respectively specified year | migration across the borders of Upper Austria
2 difference from immigration minus departures
3 Internal migration: migration within Austria | External migration: migration from or to foreign countries

Naturalisations¹

Most popular first names – by gender¹⁺⁷

1 year 2023 or specified year
2 naturalisations per 1,000 non-Austrian citizens
3 classification according to the most recent year
4 excluding Croatia and Slovenia
5 excluding the United Kingdom
6 differences due to rounding possible
7 respective first names of newborns whose mothers have their main residence in Austria at the time of birth | in original spelling without special characters

Private households and families¹

Private households

Families²

1 year 2022 according to the register-based labour market statistics as of 31 October or census in the respective year indicated (2001 national census, 2011 register-based census)

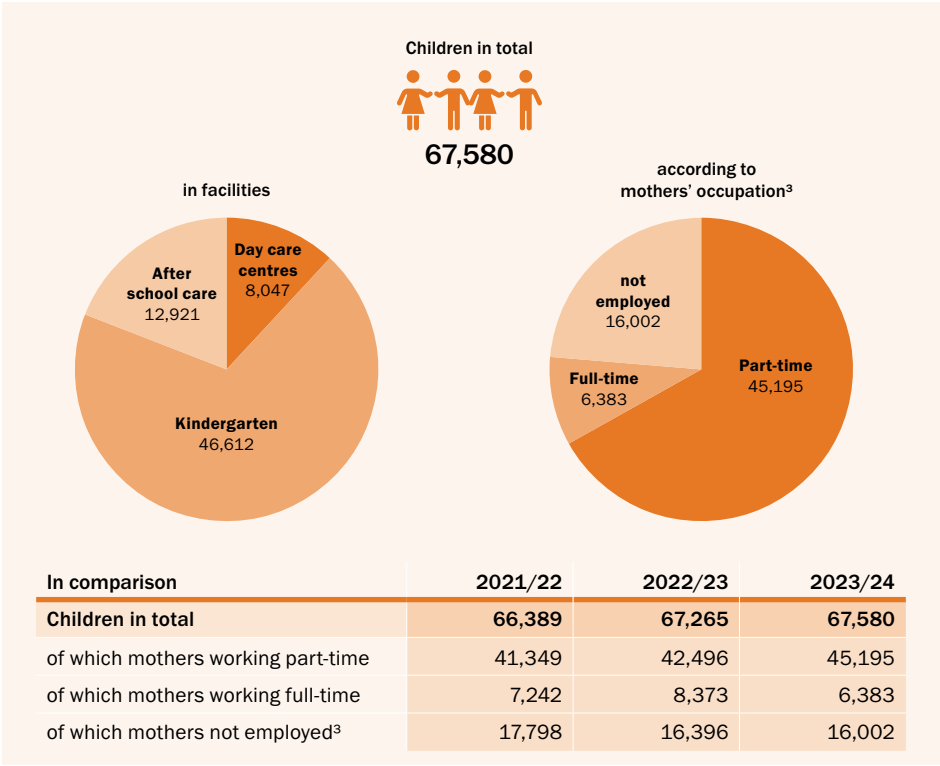

2 A family is formed by married couples and cohabitations with or without children or single parents

3 The term “children” refers to all biological, stepchildren and adopted children living in the same household with both parents or one parent, who live in the household without a partner and do not yet have children of their own – regardless of age or occupation

Average number of children in families

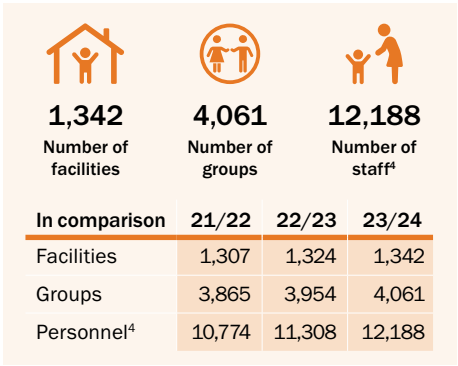

Children in childcare

Childcare ratios²

Facilities

1 2023/24 or respective specified reporting year | located in Upper Austria

2 percentage of children in institutional childcare facilities in relation to the resident population of the same age

3 Children of single fathers are included in the “not employed” group

4 staff including teachers and assistants (number of employees)

Day care centres¹
